

Labfax Product Datasheet

Product Code:	INK1624G090
Description:	Optical white, opaque precoated, high density polyester satin. Suitable for printing with Epson C3500 Label Printer
Physical Characteristics:	
Warp:	75 yarn/cm
Weft:	150 yard/cm
Total Weight:	292 g/m ²
Total Thickness:	280 micron
Adhesive:	G1104 - Permanent hotmelt adhesive, high tack.
Supply:	Can be supplied in any width from 30mm, MOQ's based on full deckle width of 1450mm
Colour:	Optical White
Printers:	Epson C3500
Applications:	For printing of garment and wash care labels
Storage:	18-23°C, 50-55% RH, avoid UV and close heat source exposure. Do not freeze. Do not stack higher than 50cms.
Conditions:	Allow print to dry sufficiently to obtain maximum wash ability. It is advised to do preliminary printing trials, to evaluate the water resistance and to test the compatibility with pigment inks. For optimal lasting quality prints made with dye-based inks, frequent and/or long-lasting exposure to high humidity levels (e.g. above 75% RH) should be avoided if possible.
Shelf Life:	1 year in original packaging
